

Mystery Screensaver Windows 98 32

Of all the screensavers in Win98, some of them work, .scr files along with their .dll files in C:\Windows\System32, .mystery.scr C:\...\mystery.scr. But, I think I can use them with any application. I checked and each of them works with all applications in Win98 and C:\WINDOWS\SYSTEM32\ and C:\WINDOWS\system32\ ... So yes, they work, but they were not added to my list of applications. I have tried installing it on other machines as well as my Win8.1 machine, and it works with all applications. I don't want to add them to my app list because they seem to have some issues.
