The game Kasmio has some simple rules, but it's very difficult to master. And Kasmio is not just a test of patience, but a real challenge. Only the best of you will make it to the top. At the very bottom are the players with the lowest score. Don't think it's so easy and that you will instantly hit the bottom. You will lose, because you don't have enough points. You must launch rockets to destroy bombs on the playing field. When a bomb hits the trajectory is established and the rocket flies to the exact target. It's a fine adjustment, but even this is too difficult, if you miss the bomb. So be good. And launch at least three rockets. Kasmio is designed for the mobile devices: iPad, iPad Mini, iPod Touch and iPhone.
