Simplifies and speeds up the process of.Q: Python exception not being caught properly I have an exception with the following code: `try: unserialize(file.read()) except Exception as e: raise Exception("Error opening file: {0}".format(e))` I need this to be able to catch any `FileNotFoundError` as well as the general `Exception`, but it does not seem to happen. This is the output: `Traceback (most recent call last): File "test.py", line 24, in unserialize(file.read()) File "/home/username/Envs/python3.7.0/Lib/site-packages/serialize.py", line 18, in unserialize version, encoding = __version__info__() IOError: Error opening file: I need this to read a json file and dump it as a dictionary. (I know that it should never read the file directly, but that's not the problem I am trying to solve) A: You can see the Exception you caught is not really an Exception: >>> unserialize(file.read()) Traceback (most recent call last): File "", line 1, in File "/home/username/Envs/python3.7.0/Lib/site-packages/serialize.py", line 18, in unserialize version, encoding = __version__info__() IOError: Error opening file: If you would do something like this you'd see it as an actual exception: try: unserialize(file.read()) except IOError as e:`
