Photoshop, a very powerful and professional photo editing software program, is purchased by Adobe for around \$800. The rest of this tutorial will teach you how to use Photoshop Elements to create cover art for your YouTube videos. You will learn a new process from scratch to complete this task in only a few easy steps. Step 1: Open Photoshop Elements You can download and install Photoshop Elements for free from the official website of Adobe here. Your computer may already have Photoshop Elements installed, if that is the case, you can skip to step 2. To uninstall Photoshop Elements first open your start menu and go to: C:\Program Files\Adobe\Photoshop Elements. Right click on the Photoshop Elements folder and select "uninstall." You may also download Photoshop Elements from your computer's operating system. Depending on your operating system you will need to search the Internet for the download. If you do not have an internet connection on your computer, you can download it from the online trial version. Right click anywhere on the page and select "Save link as..." Save the link to download Photoshop Elements from the Internet to your desktop. This is called the digital folder. Step 2: Import your images Open Photoshop Elements to create your new artwork. If you want to import any video into the project make sure you have the correct size in mind. Depending on your video resolution you may need to import the artwork as a square or a rectangle. If you want to create a square artwork, the standard aspect ratio for any movie will be 16:9. If you want a rectangle, the standard aspect ratio for any movie will be 4:3. If you are more experienced with traditional photographs and like using photographs, you can go to File > Open and choose the folder in which your photos are stored. Click on Import Photographs to import the desired images. With the artwork loaded into your computer, you will now switch to the design tab at the top of the screen. If you do not see any design tabs simply click File > New. You may now edit the artwork by double clicking on your file. You can edit any text on the cover and also change the color of the background. Step 3: Create a new document Locate the new document and click on File > New to open the new document palette. Simulated weightlessness as a novel in vitro method to study stem cell differentiation and proliferation. Stem cell differentiation and proliferation are key processes for tissue growth during development and regeneration. However, due to their low proliferation rate, the evaluation of these processes in stem cells in vitro is difficult and often poorly reproducible. We have used a novel method of simulated weightlessness (SW) to study the effects of microgravity (MG) on stem cell differentiation and proliferation. Using human bone marrow-derived mesenchymal stem cells (MSCs), we have shown that exposure to SW, in combination with appropriate growth factors, led to decreased bone morphogenetic protein-2 (BMP-2) and dexamethasone-induced osteogenic differentiation of MSCs. Furthermore, SW increased the proliferation rate, alkaline phosphatase activity, cell viability and expression of osteogenic markers such as osteocalcin and runt-related transcription factor 2 (RUNX-2). Combined exposure of MSCs to SW and insulin-like growth factor 1 (IGF-1) led to a higher level of induced proliferation compared to that in MSCs exposed to SW alone. Furthermore, SW enhanced the in vitro colony forming unit-fibroblast (CFU-F) capacity of MSCs. Altogether, these data show that the combination of SW and appropriate growth factors can be used to stimulate and/or maintain the proliferation and differentiation capacity of MSCs, which may be useful for the investigation of the effect of MG on stem cell proliferation and differentiation.

Q: Click event does not work on the first time in HTML page I want to use JavaScript to get a photo from the cloud and place it in an HTML page. On load of the page, if there is no photo, put an image in the HTML page. If there is a photo, I want to display a "click" image instead of the placeholder image. Here is the code:

```
function getImage(evt) { var x = document.getElementById("img1"); x.onclick = function() { if (x.src.length > 0) { x.src = '~/assets/images/header.png'; } else { x.src = '

Nostalgia is a common condition. Fittingly, a quick Google search for “top 25 nostalgic songs” is filled with themes from 90s Hollywood movies and pretty much every Disney movie ever made. The thing is, 90s movies are no longer as enjoyable to watch as they once were, and the Disney movies are often way too much for younger audiences. What about then, trying to find something that appeals to both nostalgia and the recent younger audiences, yet is still considered nostalgic by the current generation? Recently, Netflix released “Good Boys,” a rather raunchy coming-of-age movie adapted from a best-selling novel of the same name. But aside from raunchy humor, “Good Boys” is a blatant portrayal of teenage life during the '90s — and yet there are plenty of nostalgic elements to the film that point towards its unprecedented success. To start off, “Good Boys” has some very contemporary trappings. The title is a homage to the 2003 play “Good Boys,” which also explored the lives of teens in the 90s. The screenwriter even brought in a number of '90s actors, including the popular and booming Patton Oswalt, who plays “good boy” Kenzie. When viewed through this lens, any 90s movie about teenagers will have some nostalgic elements. Many of the tropes from this era have been recycled into movie plots over and over again: Topanga-esque outfits, a skateboarding video, a best friend with a girlfriend, or a pop star with an obsession with yoga. However, with “Good Boys,” these movies are never directly referenced, which allows it to have its own narrative. It doesn't hurt that the nostalgia is sometimes spurned, occasionally quite violently. A good example of this is when Kenzie finds out that his childhood friend was kicked out of the popular club he worked at to join the football team at his rival high school. The image of him being hounded out of his own party is quite shocking and reminds viewers of their own experience with quitting a social setting. This nostalgia even shines through the main characters. While Kenzie is the oldest of the three, Travis appears to be the most innocent and well-meaning of the trio. His strong desire to help his best friend is an interesting contrast to Kenzie's more cynical and irresponsible nature. Similarly, Kenzie plays the role
