Game Info Requires HTC VIVE and Oculus Rift. good in-game complement to Fergie because there was a real separation between the two, Fergie controlled the flow of the game, making sure that teams didn't have time to play through the full 5v5 set up and that there was plenty of time and space to pass the ball. Fergie's major strength is his ability to take players on one-on-one and draw fouls. It was that aspect of his game that led to him being the 2009 MVP and being part of the three-point celebration that catapulted the Bulls back into a place where they still had time to fight and, should they win it all, they would be playing in the Stanley Cup Finals. Despite his size, Fergie had a terrific first step, with a killer crossover, a beautiful jumper, and a hard, one-armed go-up strong enough to break a rack of ribs. He also was a top passer with a great basketball IQ. While Fergie has always had a great understanding of the game and has been able to create his own shot, it was the way he passed to the open man, knew which teammates to put the ball on, and then found the open man with the screen or the outlet pass that really made him so effective. Currently, Fergie's

offensive rating is 120, which is dead last among active players. He has no three-point percentage and an offensive box plus/minus rating of zero, which means that he is literally zero points better than the average NBA player on

It is time for the release of my last few series of Trumpeteer posts. My reviews are separated from my critique by a look at Hannibal himself, and what his legacy of terror. With Macmurray's latest release, it feels that Hannibal's time has come. We have an almost perfect balance of striking visuals, and interesting, well-written characters, into a mix that should inspire some interesting stories. In Hannibal, most recent reviews have focused primarily on the previous seasons, and as I was listening to the story unfold, I found myself thinking: "Yes, Hannibal, we will have our revenge!" We will go over the story, the characters, the editing, then my review of how well Hannibal ended the series. We will then move on to some brief character analysis, have some commentary on Hannibal as the mythic character, and then move on to discuss some of the previous seasons that should intrigue you. I will not be rehashing anything, I will just be exploring a few episodes and characters who contributed to the series, and the impact they had. The Story and Visuals When I reviewed 1.1.3, I mentioned that there was a disconnect. I felt like there was an excessive amount of trauma that found no resolution. This is a problem that author Thomas Maier has explored in Season's Past. Those past stories were a reaction to terrible things that had already happened in the past, and little in the way of resolution. But as stated before, according to this story, things have been done, and the repercussions of those actions have been felt, and the cycle continues. In a way, this story is almost an Ouroboros. It is the cycle of "Mr. Lecter, will you eat me?" The most pertinent question of the series, or more specifically, of the theories of Hannibal that has run parallel with the show. But that has already happened so many times... the only difference being that Hannibal is now taking his revenge on Mlle. Dix, and on herself. The story is already a classic tragedy, in that it repeats itself and turns into the same narrative. The protagonists realize that they love one other, he does the same, and the fatal error is made when love turns into hate, and when the

equilibrium is upset. It is interesting to read the source material and how the parallels are made here. There is not much to say about the

I AM OUT THERE!! This is an eco-friendly test pattern for the game project this year. I made the game and even the user interface. The game play and the visual style were done by other people. But, I did the design of the controls. Also, I did the character animation too. If you enjoy the game, feel free to check out the other games that I create as well as the other artworks that I made here on DeviantArt! My tumblr can be found here: my facebook can be found here: How to turn on/off tabs when the list has been changed on tab menu I have a multi-tab page that I created. It has a search form and then a result listing. I want to make it so that when you click on the tab menu item, it changes the content on the tabs. This works fine when you have a complete search term, but when I change the search term (I have a search input box on the first tab) I want the tab to change the list (displaying the new result listing), but leave the other tab un-shifted. In other words, when I have a new search term, I want to only change the content on the tab menu that has the new search term. Here's my current code: HTML: Test Tabs
