I've played Star Trek: 25th Anniversary: The Search for Spock and Star Trek: 25th Anniversary: The Motion Picture, as well as Star Trek, as part of the EA Star Trek: The Next Generation CD-ROM, but I don't remember anything like that during those games. I do recall that I didn't like the slow frame rate and poor controls of 25th Anniversary: The Search for Spock. If you play Star Trek: 25th Anniversary: The Motion Picture, you'll see that I was wrong; it's actually got a great control scheme and fast frame rate. As a fan of Star Trek: The Next Generation I'd recommend checking out the 25th Anniversary series. The games are a real blast and since the beginning of the 25th Anniversary series was set in the future, it has tons of references and features that will appeal to fans of that show. P.S. If you do get the above game, I'd really recommend The Motion Picture because it's got some really great action! :D Q: Find repeated elements based on a string in a pandas dataframe I have a data frame named df in which I have a column named x which has several items. For example: x [0, 1

What's new in Star Trek™ : 25th Anniversary:

- Star Trek II: The Wrath of Khan The crew of the U.S.S. Reliant, trapped in the central section of the Galaxy-class starship Excelsior three years earlier, begin to question if they're not dreaming when they find themselves in the presence of a woman they've not seen in nearly two decades. As they continue to journey through a series of bizarre "vistas," this group of intrepid explorers begins to wonder if all they've been through isn't, ultimately, madness.... Perhaps the best blockbuster trilogy of all time, Star Trek II is simultaneously a repudiation of the peace-loving ideals of the utopian show and a joyous celebration of the very things it tries to subvert. I am a big fan of the Star Trek franchise and I love and respect the original series, so I was given a pretty high standard for this one. The first movie was good, but it was a bit generic and had some cheesy bits. Spoiler (mouse over to view) The second movie was a little more coherent with the first so it was noticeably better. It was somewhat constrained by the first movie. I sat down for the third movie and I was a little disappointed. Some parts were very unconvincing and other parts were simply lame. I felt like it showed just how shallow the story-writing can be when you don't know what to expect for each story arc. The film did have some funny bits and witticisms, but I felt like they weren't really smart enough for the material they were trying to convey. You just felt the script had been written in a hurry. I felt like the movie pulled away from what was original and at times devolved into a cheap action film. In an attempt to build back towards the original and even a defense of the show, it ended up being both. To be more accurate, it's both a dismissal and an apology. The writers know they

have created a cult of inept, unfocused fanatics that they might as well just roll into and smite. An apology for mocking this audience while building on the original. Funny, Star Trek II came up on my radar yesterday out of nowhere, and I hadn't planned to watch it tonight. Then I was reading a review (on the Internet) and I noticed that it was rated #2 for the greatest film trilogy. I watched it...and I can't believe it. I expected my imagination to work, but
